Product Detail

eeWebMembershipPro gives your website an excellent platform to register and manage members and secure your ASP pages. It does not matter if you are an experienced developer or a beginner who does not have any programming knowledge;

eeWebMembershipPro can be easily installed and then managed from its browser based administration section to give you complete control over the registered members.

Benefits

User

- **Member signup:** You can now signup members based on different registration forms and the fields in each of the forms can be optional or mandatory. Each signup form can have an auto generated expiry date for the member, auto level and group assignment.
- **Additional fields:** eeWebMembershipPro has 6 additional fields that you can rename based on your requirement right from your administration page. So you don't need any customization to add additional fields.
- **Approve before access:** You can approve a member before the member can access the website after signing up for your website's membership.
- **Activation from email:** You can stop unwanted/invalid members from registering by forcing them to activate their membership by clicking on a link in their email.
- **Basic Password Protection:** It provides the basic password protection for any ASP page or ASP application. The protection is based on the sessions and can automatically timeout based on the time set by you.
- **Member Expiry:** Every member can have an expiry date after which the member cannot access the website. The members can also have unlimited access based on your discretion.
- **Member activation/deactivation:** You can activate or deactivate a member by just checking a checkbox from the admin section. You also have a choice of doing it during signup.
- **Group Based Security:** You can assign a member to many groups and also protect any file for multiple groups. The access to these files can be granted to the members of those groups only.
- **Level based security:** Every member can be assigned an access level during signup and your website or files can be protected based on the member levels.
- **Mailing list:** From Admin panel you can send email to all members
- **Forgot Password:** The members can retrieve their forgotten password to their email address by just entering their username.
- **Edit profile:** The members can edit their profile and change their password very easily at any time.

Admin

- **Groups Management:** Add/edit/delete groups from an easy management interface. You can have unlimited groups.
- **All Member listing:** Detailed member listing of all members registered with your website. You can also edit or delete a member from the same page.
- **Group based member listing:** You can view all members belonging to a certain group from this screen.
- **Manage mail list:** You can add or remove members from the mailing list from this screen.
- **Send newsletters:** You can send newsletters to all members based on their levels, groups and also send newsletters to all the mailing list members.
- **Setup preferences:** You can change the preferences of the website in a live mode and change will take effect right away. You do not need to physically edit any file and change them.
- **Member logs:** You can view logs for all the members, all the information during their login is logged into the database. You can also reset this information easily.
- **Expired members:** You can view all expired members from this screen and delete them or edit them from a link.
- **Manage blocked emails:** Add/Delete email addresses and manage them.
- **Viewing of records:** All the listings in the admin section are paged and can be easily browsed through by clicking on the page numbers.
- **Advanced search of members:** You can search for members with a particular field and in a particular group.
- **Basic keyword search:** Search through the members with a simple keyword search.
- **Reset all member logs:** Easily reset the logs for a particular member or all the members by the click of a single button.
- **Instant stats:** Get instant information on how many members, mailing list members, groups, approve message, member logs are listed on your website.
- **Change maximum levels:** You can have unlimited levels, just modify it in the admin interface and you can start using them.
- **Email any single member:** Send an email to any member from the listing pages.
- **Send newsletters based on groups:** Members of a group can be sent newsletters.

Features

- Password Protect any vbscript ".asp" page
- Web Based User Administration
- Multiple Access Levels
- Groups
- Protection Code Generators
- Handy wizards that create the code you need to paste into your existing ".asp" pages to protect them
- Crystal ball feature
- On the users screen this feature allows you to preview a user's info without clicking on edit
- Send Username & Passwords to multiple users at once
- Import/Export Users via web based interface
- Users Can Expire
- Ability to set the amount of times a user can log in. Once they hit their limit the system sets them as inactive
- Users Can Be Set Inactive
- Record Cycling And Sorting Features For Web Based Administration Area
- Keyword Search
- Contact Information For Users
- Cookie Remember Me Option so users don't have to log in every time they come back to your protected pages
- Users can register themselves
- User registration area has configurable form validation. There are 6 additional built in custom fields that you can enable and label however you like. This allows you to easily add custom fields you may need without having to do a lot of work
- Automatic Registration Approval Option where the system automatically activates the user
- Manual Registration Approval Option where they are not active until you manually activate them
- Automatic Registration Via Email Validation Routine where user must respond to email that is sent to them before they are activated
- User Information is available throughout the user's session. You can access that information at any time on any of your ".asp" pages. You can use that information to create dynamically created pages based on what user is logged in
- Supports Persist ASPEMAIL, CDONTS, SoftArtisans.SMTPMail, and Dimac JMail.SMTPMail Allowing the program to send emails when users register themselves and when they lose their passwords. It will also email you when a new user registers so you can activate them
- Email users of the system. This automatically generates a text message notifying the user of their username & password
- Mass Email users of the system. Performance of this option varies based on server configuration and number of users. This is because using ASP to send mass emails is not very efficient
- Email Forgotten Password Feature
- Tracks how many times a user has logged in and also the time & date of the last login. There is also a reset feature per user
- Text file logging that keeps track of every login to your site and the IP addresses used. Web based screens to review the log files
- Works with ACCESS and SQL Server

Screenshots

eeWebAccountant is completely web based application and runs directly from your web browser and is completely menu driven. We have given below some screen shots for your idea.

Please visit our website www.eewebmembershippro.com/screenshots.htm for more screen shots.

customer	vj@eentreprenues.biz	4	NEVER	Yes	No
demo	demo@ee.biz	4	NEVER	Yes	No

System Requirements

- Runs on IIS 4.0, 5.0, and 6.0
- Also runs on Personal Web Server so you can install it on a local machine for development & testing.
- Uses MS Access or MS SQL Server.
- MS Access Database Included (You do not need Microsoft Access to run this).
- MS SQL 7/2000 Scripts included making it easy to create the SQL database.
- Intel Compatible Based System with current ODBC drivers installed.

Testimonials

The following are testimonials from some of our clients. *Smart Business FZE* is dedicated to customer service and producing high quality work that meets the needs of our clients.

“eeWebMembershipPro is exactly what we needed and it worked like a charm. It is very easy to use. I love the feature where new members self register and the program notifies me. Owing to its best performance, we have got its two licenses for our two different property sites. “

Kamel KKLA, *Manager,*
New Granada Property Management
Toledo Property Management

“I found the installation straightforward. I had a couple of server configuration issues that technical support immediately helped me clear up. You can use this program confidently and you will get technical support, whenever, you require.”

John Reed

“I have used eeWebMembershipPro. I have found no problem at all even as our database grew or even when we moved servers and my other ASP programs required changes.”

Hellen Schleicher
